Education

R. V. College of Engineering

Bachelor of Engineering in Computer Science — CGPA: 8.73 (Present)

Bengaluru, India

2023 – 2027

Jnanasudha P.U. College

PUC (Karnataka) — KCET Rank: 325 | JEE Mains: 98.9 Percentile | Boards: 98.5%

Karkala, India

2021 – 2023

Podar International School

Class 10 (CBSE) — 94.2%

Shivamogga, India

2020

Technical Skills

Languages: C++, Java, Python, C

Core: Data Structures & Algorithms (400+ problems), OOP, OS, Computer Networks, DBMS, Digital Logic

Web & Frameworks: HTML, CSS, JavaScript, React, Node.js, FastAPI, Flask

Databases: PostgreSQL, MySQL, Firebase, PostGIS

Tools & Platforms: Git, GitHub, Docker, Linux, VS Code, AWS, Arduino IDE, n8n

Soft Skills: Adaptability, Time Management, Team Collaboration, Leadership

Academic Projects & Experiences

Citizen Issue Reporting System (*In Progress*)

2025

- Built a geospatial civic-tech platform using **FastAPI**, **PostgreSQL+PostGIS**, **Docker**, and **React+Leaflet**, enabling location-based issue reporting with JWT-authenticated admin resolution workflows.
- Designed a scalable REST API with Swagger/OpenAPI docs; structured for municipal IoT integration aligning with **UN SDG 11**.

Blockchain-Based Records Management and Verification System

- Developed a decentralized document verification platform using **React**, **Node.js**, **MySQL**, and **Ethereum smart contracts** with **SHA-256** hashing for tamper-proof audit trails.
- Implemented role-based dashboards with expiry validation and on-chain verification, reducing manual document fraud risk.

Fine-Tuning a LLM on NCERT Educational Data for Enhanced Answer Accuracy

- Fine-tuned an open-source LLM on **1.2 lakh+ curated NCERT examples** using **Google Colab**; achieved measurable improvement in curriculum-specific answer quality across evaluation runs.
- Engineered data cleaning and preprocessing pipeline to reduce noise, improving training stability and model generalization.

Mandir Connect | Full-Stack Web Application

- Built a full-stack temple management platform with event booking and online donations; integrated **Google Maps API** for temple discovery and **Razorpay** for secure payment processing.
- Designed separate role-based dashboards for users and admins, improving workflow efficiency for temple coordinators.

IoT-Based Voice-Automated Wheelchair

- Engineered a voice-controlled wheelchair prototype using **ESP32**, **Firebase**, **Blynk**, and **Arduino**; implemented ultrasonic obstacle detection and grid-based automated path control for hands-free mobility.
